

[SENA Cases for iPhone Available](#)

Nov 18th, 2007 by [SolSie](#)

We'd greatly appreciate your support SolSie.com by visiting our [affiliate store](#) for your holiday gifts. The store features accessories, software, GPS, Bluetooth headsets, etc.. This week we feature the new SENA cases for iPhone available in several colors.

Constructed from luxurious European Napa leather, this case was designed to fully protect and showcase your prized smartphone. Each Sena case is hand-stitched with openings for all iPhone ports and controls, including one for the proximity sensor. The leather flip top, that fastens with a hidden magnetic strip, will give you easy access and full protection to your phone. The case also allows you to use your phone without removing it from the case.

This streamlined case also has a special feature, a "Bantam" ratchet belt clip with removable tab (**case available with or without belt clip**) that can lock the device into vertical or horizontal positions.

The interior of this case is lined with a soft velvet material and it features a multi-purpose pocket to store your business or credit cards.
